---

Dear Mr Oz,

I have just finished developing the v0.2.0 of StuCo Management with functionality for the stock list. (First Update!!) I have made the changes you requested in your previous email, together with the additional functionality planned.

I have attached a screen recording of v0.2.0 for your reference together with the installable file. (I do not recommend that you install the app on your personal device as it is not ready for use currently.)

Thanks,

Developer

Dear Developer,

This is beginning to take shape! I like the new layouts! The stock management system looks useful. However, could you change the way that products are deleted/updated? The current system makes it a little too easy to delete stuff accidentally, could you change it to a slidable tile that shows options that can be done if necessary? I think that would make it better.

Best regards,

Ozgul Kazanci
